FUZZPHRASE COMPUTER

This is a semi-automatic device for generating striking or memorable phrases in memoranda, telephone conversations, proposals, spec negotiations, or other occasions requiring obfuscatory capability. Take any random 3-digit number, and choose from columns A, B and C, respectively, the words corresponding to each digit. (e.g. the number 792 is optimal third-generation flexibility).

FUZZINESS...

is one thing we've avoided in the specifications for our Series 8000 Designer's Choice Logic. Want a clear demonstration of what we mean by the term cross-family compatibility? Check into Signetics Series 8000 DCL, a fully compatible set of integrated logic circuits selected from three families... High Speed TTL, Low Power TTL, and High Noise Immunity DTL.
